

Magna Labs is collaborating with Learn It Online to provide a range of courses and resources for its customers

Your Trusted Partner In Pathology Laboratory Services

In order to provide our customers with a value-added service, Magna Labs is providing educational grants for organisations wishing to access appropriate educational programmes designed and hosted by Learn It Online.

## — Therapeutic Drug Monitoring & Its Application In Mental Health —

A comprehensive programme for healthcare professionals wishing to enhance their knowledge around the role effective TDM can play in managing certain mental health conditions, in particular schizophrenia and bipolar disorder.

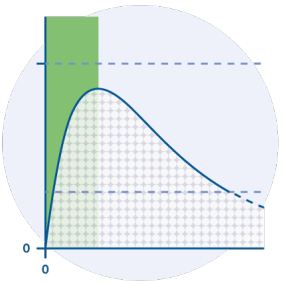

### Haematology - A Concise Clinical Overview

This module provides a useful refresher in haematology for mental healthcare providers caring for people who are being treated with the mood-stabiliser lithium, or antipsychotic medicines, in particular clozapine. In addition to providing a concise reminder of the types and functions of the different cells that make up our blood, this module and accompanying resources, reinforces the vital role certain haematological checks play in helping to keep patients safe and well.

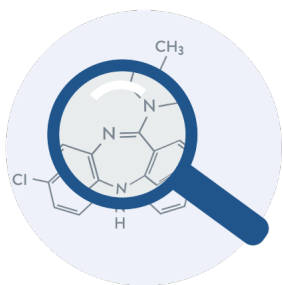

## Pharmacology - A Concise Clinical Overview

This module provides a useful refresher in pharmacology for mental healthcare providers caring for people who are being treated with certain psychotropic medicines. In addition to reinforcing the differences between pharmacokinetics and pharmacodynamics, it provides a helpful reminder as to the importance of a drug's pharmacology in understanding, predicting and managing an individual's response to certain medications.

## Therapeutic Drug Monitoring - A Concise Clinical Overview

This module provides an important fore-runner to module 'Therapeutic Drug Monitoring in Clinical Practice'. In addition to providing background, financial and clinical context to TDM, this module provides a useful overview of both sample collection and result interpretation.

## Therapeutic Drug Monitoring In Clinical Practice

This module takes you through the process of TDM for the 6 antipsychotic medicines: clozapine, olanzapine, risperidone/paliperidone, quetiapine, aripiprazole and haloperidol. In addition to reviewing the pharmacology of the various drugs and their formulation, this module provides guidance on why and when the sample should be taken, together with interpreting the results.

# Clozapine Courses

## Clozapine - A Concise Clinical Overview

A condensed version of our comprehensive course tailored towards healthcare professionals who are working in community or acute care settings. The 3 modules cover a wide range of topics, in particular blood monitoring and managing side effects. It also incorporates reflective elements, allowing the learner an opportunity to explore and understand the wider aspects of supporting people living with mental health conditions.

### STEP 1 - CHOOSE YOUR COURSE BUNDLE

As a Magna customer, Magna Labs is offering a range of educational grants to support their customers in accessing the silver bundle. If you wish to upgrade to the gold bundle, contact Learn It Online to discuss your options.

If you're wishing to upgrade to the Gold Bundle package, you may be able to get funding for the clozapine concise course through your clozapine supplier.

Contact Learn It Online for more information: [info@learnitonline.co.uk](mailto:info@learnitonline.co.uk)

#### GOLD BUNDLE

##### COURSES

- ✓ Therapeutic Drug Monitoring & Its Application In Mental Health
- ✓ Clozapine - A Concise Clinical Overview

#### SILVER BUNDLE

##### COURSES

- ✓ Therapeutic Drug Monitoring & Its Application In Mental Health

## STEP 2 - CHOOSE YOUR ACCESS

Next, choose how you wish to access the courses and resources, either through Learn It Online's Learning Management System (LMS) or the files can be sent to your organisation's IT team to upload into your own LMS.

### MAGNA GROUP

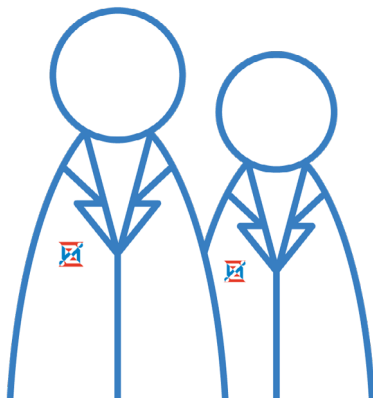

Access to courses and resources through **Learn It Online's** Learning Management System

- ✓ Learn It Online will set up your learners on the platform
- ✓ Certificate on completion of each course
- ✗ Generate and export reports on Learners progress
- ✗ Assign Group Leaders to manage Learners

### MAGNA UNLIMITED

Access to courses and resources through **your organisation's** own Learning Management System.

- ✓ SCORM files sent to you to upload into your system
- ✓ Template certificates sent to you to upload into your system
- ✓ Generate and export reports on Learners progress
- ✓ Assign Group Leaders to manage Learners
